**GENERAL NOTICE LETTER**

**URGENT LEGAL MATTER, PROMPT REPLY NECESSARY**

**CERTIFIED MAIL: RETURN RECEIPT REQUESTED #7014 0150 0000 2406 5005**

George Lotspeich  
Cobb Resources  
4011 Mesa Verde NE  
Albuquerque, New Mexico 87110

Re: General Notice Letter for the San Mateo Creek Basin Legacy Uranium Mines Superfund Site in Cibola and McKinley Counties, New Mexico

Dear Mr. Lotspeich:

Under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), commonly known as the federal “Superfund” law, the EPA is responsible for responding to the release or threat of release of hazardous substances, pollutants or contaminants into the environment – that is, for stopping further contamination from occurring and for cleaning up or otherwise addressing any contamination that has already occurred. The EPA has documented that such a release has occurred at the San Mateo Creek Basin Legacy Uranium Mines Superfund Site. The EPA has spent, or is considering spending, public funds to investigate and control releases of hazardous substances or potential releases of hazardous substances at the Site. Based on information presently available to the EPA, the EPA has determined that Cobb Resources may be responsible under CERCLA for cleanup of the Site or costs the EPA has incurred in cleaning up the Site.

**Explanation of Potential Liability**

Under CERCLA, specifically Sections 106(a) and 107(a), potentially responsible parties (PRPs) may be required to perform cleanup actions to protect the public health, welfare, or the environment. PRPs may also be responsible for costs incurred by the EPA in cleaning up the Site, unless the PRP can demonstrate divisibility or assert one of the statutory defenses. PRPs include current and former owners and operators of a Site, as well as persons who arranged for treatment and/or disposal of any hazardous substances found at the site, and persons who accepted hazardous substances for transport and selected the site to which the hazardous substances were delivered.

Based on the information collected, the EPA believes that Cobb Resources may be liable under Section 107(a) of CERCLA with respect to the San Mateo Creek Basin Legacy Uranium Mines Superfund Site, as a current or former owner and/or operator of facilities located within the Site. Specifically, the EPA has reason to believe that you owned or operated the legacy uranium mines within the San Mateo Creek Basin identified in Enclosure 1.

To date, the EPA and the State of New Mexico have taken several assessment and response actions at the Site using Superfund authority, documenting releases of hazardous substances to soil and ground water. Reports from many such actions were provided to you on CD at the informational meeting on March 20, 2018. Below is a brief description of some of the actions undertaken at the Site.

- Pre-CERCLIS Screens for Grants Mining District Five Year Plan priority mine sites.
- Time Critical Removal Actions, conducted to reduce any immediate threat to the environment or human health posed by the Site, specifically for installation of point of use treatment systems on domestic use water wells.
- Removal Site Evaluations initiated to assess surface contamination at legacy mines within the San Mateo Creek Basin.
- Engineering Evaluations and Cost Analyses initiated to evaluate potential surface removal response actions at legacy mines within the San Mateo Creek Basin.
- Expanded Site Inspection Phase I Ground Water Study.

### **Demand for Reimbursement of Costs**

In accordance with Section 104 of CERCLA, the EPA has already taken certain response actions and incurred certain costs in response to conditions at the Site. The EPA is seeking to recover its response costs and all interest authorized to be recovered under Section 107(a) of CERCLA. To date, the approximate total response costs identified through January 31, 2018 for the Site are \$9,643,075. Under Section 107(a) of CERCLA, the EPA hereby makes a demand for payment from your company and other PRPs for the above amount plus all interest authorized to be recovered under Section 107(a). A summary of these costs is attached as Enclosure 3.

Some or all of the costs associated with this notice may be covered by current or past insurance policies issued to your company or its predecessors. Most insurance policies will require that you timely notify your carrier(s) of a claim against you. To evaluate whether you should notify your insurance carrier(s) of this demand, you may wish to review current and past policies, beginning with the date of your company's first contact with mines located within the San Mateo Creek Basin Legacy Uranium Mines Site, up to the present. Coverage depends on many factors, such as the language of the particular policy and state law.

### **Potential for a Superfund Alternative Site Approach**

The EPA has two main paths to achieve cleanup at Superfund sites that require long-term remediation. The traditional path involves the EPA listing the site on the National Priorities List (NPL), identifying the PRPs, and working with them to secure the cleanup or payment for cleanup. An alternative path is known as the Superfund Alternative approach (SA approach), which is designed to parallel the NPL path with the exception of listing the site on the NPL. The threshold criteria for a site to be eligible for the SA approach are:

- be eligible for inclusion on the NPL (*i.e.*, currently proposed to the NPL, or would have a Hazard Ranking System score above 28.5);
- require long-term response action; and
- have financially viable and capable PRPs that the Region believes are willing to perform the cleanup work under an Administrative Settlement Agreement and Order on Consent or a Consent Decree.

The EPA guidance on the SA approach, *Transmittal of Updated Superfund Response and Settlement Approach for Sites Using the Superfund Alternative Approach (SAA Guidance)* (9/28/2012), provides more discussion of the SA approach. The Revised SAS Guidance is available at <http://www.epa.gov/enforcement/transmittal-memo-updated-superfund-response-and-settlement-approach-sites-using>.

Sites where the SA approach is used should meet the same cleanup standards as NPL sites, and negotiated SA approach agreements are very similar to agreements negotiated at NPL sites. SA approach agreements are eligible for the same settlement incentives as those available at NPL sites (*e.g.*, orphan share compensation, special account funds).

The EPA Region 6 believes that the San Mateo Creek Basin Legacy Uranium Mines Superfund Site qualifies for the SA approach. Accordingly, the EPA is interested in discussing your willingness to perform a remedial investigation and feasibility study (RI/FS) under the SA approach. On May 17, 2018, EPA sent out a draft Administrative Order on Consent and Statement of Work for RI/FS based on the SA approach model to all those who participated in the March 20, 2018 information meeting. If there is insufficient interest in the SA approach at this Site, the EPA will pursue the traditional NPL path. If negotiations for an SA approach agreement proceed and subsequently reach an impasse, the EPA will consider how to proceed based on site-specific circumstances.

### **Information to Assist You**

The EPA encourages communication between you, other PRPs, and the EPA concerning the Site. The EPA recommends that all PRPs meet to select a “steering committee” that will be responsible for representing the group’s interests. Establishing a manageable group is critical to successful negotiations with the EPA. If participation through a steering committee is not possible, the EPA encourages each PRP to select one person from its company or organization to represent its interests to the EPA. Some of the stakeholder participants in information meetings since March 20 have already formed a Working Group and are in communication with the EPA in connection with this Site.

To assist you in your efforts to communicate, please find the following attached information:

- A list of names and addresses of PRPs to whom this letter is being sent (Enclosure 3).
- To the extent information is available, a chart of the mines, owners, and operators within the San Mateo Creek Basin identified by the EPA to date. This is an initial list subject to change based upon new information (Enclosure 2).
- Documentation linking your company to the Site (Enclosure 1).
- An unreconciled SCORPIOS cost summary for San Mateo Creek Basin (Enclosure 4).

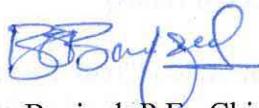

General information on the Hazard Ranking System (HRS) can be found on the "HRS Toolbox" at <http://www.epa.gov/superfund/hrs-toolbox>. The HRS Toolbox provides current guidance documents that may be used to determine if a site is a candidate for inclusion on the National Priorities List.

### **Conclusion.**

Please give these matters your immediate attention and consider consulting with an attorney. If you are not currently a member of the Working Group, please contact Mr. Stephen Capuyan, Enforcement Officer, at 214.665.2163 within 14 calendar days of the date of this letter regarding: (1) your willingness to enter into negotiations for RI/FS, or (2) information about why you may not be a PRP, or the size of your waste contribution to the Site, or your financial status. If you have legal questions or concerns, please contact Ms. Pam Travis, Attorney, at [travis.pamela@epa.gov](mailto:travis.pamela@epa.gov) or 214.665.8056.

Thank you for your prompt attention to this matter.

Sincerely,

Ben Banipal, P.E., Chief  
Technical and Enforcement Branch  
Superfund Division
